

**Invitation to all interested parties at the
Conference « Les avancées en recherche sur l'ARSACS :
Contribution des personnes atteintes du Saguenay–Lac-St-Jean »
February 28, 2019, Jonquière (Québec)**

A major research program on ARSACS has been going on since 2011 in the Saguenay-Lac-St-Jean region with the support of the Ataxia Charlevoix-Saguenay Foundation. Dr. Cynthia Gagnon, Director of the Interdisciplinary Research Group on Neuromuscular Diseases, will present the research results and their potential contributions for future therapeutic trials. This conference will coincide with the Rare Disease Day which takes place on February 28.

Invitation to all interested parties: whether you are a person with ARSACS, a loved one, a clinician or someone who is interested in the subject. It will be a good opportunity to learn more about the work done on the Ataxia Charlevoix-Saguenay and ask your questions!

The conference will take place on February 28, from 2:00 pm to 3:00 pm at the salle polyvalente de la bibliothèque de Jonquière. Note that the location can accommodate people with reduced mobility.

You cannot attend? The conference will be posted on the Foundation website.
